SUMMARY

- **Profile:** Backend developer specializing in Azure cloud infrastructure, full-stack applications, AI integration, and containerize solution.
- **Core Strength:** Experienced with hands-on Azure cloud services, web development, iOS, hosting infrastructure, Docker and Kubernetes.
- **Objective:** Seeking a January 2027 entry-level Backend Cloud Developer role, and fully dedicated to gain new experience.

TECHNICAL SKILLS

- Languages: C#, PHP, TypeScript, Python, Swift, Linux.
- Infrastructure: Azure Cloud, VPS, Cloudflare, DNS, Nginx.
- Containerization: Docker, Git, GitHub, Azure Container Registry, Azure Kubernetes Service (AKS).
- Database: PostgreSQL, NoSQL, Vector.
- Technology: Blockchain, Supabase, LLMs, GPU Computation.

EXPERIENCE & PROJECTS

UniKL MIIT KAILA Internship (August 2026 - December 2026)

- Assisted in developing the iOS mobile application under Swift environment.
- Configured lab PC as a local server environment by utilizing Cloudflare Tunnel to support application backend operations and testing.
- Integrated the local server with Convai AI to establish real-time, bidirectional text-to-text and speech-to-speech conversational capabilities with the active AI model.

Final Year Project: Blockchain Phygital Apparel System

- Built a Web3 e-commerce platform enabling physical apparel purchases via the Ethereum Sepolia network.
- Integrated Thirdweb SDK for Uniswap wallet connectivity and secure on-chain transaction checkouts.
- Combined a React frontend with a Supabase database to synchronize crypto transaction receipts directly to physical shipping forms.

Commercial AI Ad Analytics Platform

- Developed an SME ad analytics platform utilizing open-source Meta Prophet algorithm to forecast campaign trends.
- Vibe-coded the application using TypeScript for the frontend and main API connector, paired with Python for tuning the predictive engine.
- Managed full production setup across Linux VPS hosting, domain mapping, load balancing, and SEO.

EDUCATION & TRAINING

Diploma in Information Technology | Universiti Kuala Lumpur MIIT | July 2024 - December 2026

- Information Technology management
- PostgreSQL
- ASP.NET
- Statistic & Analytics

Ongoing Certification Preparation

- Azure AI Engineer Associate: Exam expected 11 October 2026.
- AWS Cloud Foundational: Project Ignite training program (12 Oct 2026 - 27 Feb 2027).

Platform Skill Badges

- Microsoft Azure: Azure Kubernetes Service (AKS), Container Apps, Container Registry, AI Workflows (Event Grid, Service Bus), and Azure Databricks.
- Google Cloud: Kubernetes in Google Cloud, AI Infrastructure (Cloud GPUs), and Machine Learning Operations (MLOps) Fundamentals.

ADDITIONAL SKILLS

- Soft Skills: Analytical Problem-Solving, Rapid Adaptability, Cross-Functional Communication.
- Languages: Bahasa Melayu, English, Mandarin.
