Kuala Lumpur/Penang(willing to relocate)

SUMMARY

Hybrid Cloud Engineer specializing in Azure and AWS cloud infrastructure, containerized solutions, full-stack applications, and secure deployment pipelines. Brings hands-on experience across cloud service orchestration, modern web frameworks, iOS development, and hosting infrastructure. Seeking a Hybrid Cloud Engineer entry-level position starting January 2027 to deliver resilient multicloud solutions, solve complex infrastructure challenges, and drive organizational growth.

TECHNICAL SKILLS

- Languages: C#, PHP, TypeScript, Python, Swift, Bash.
- Infrastructure: Azure, AWS, Linux, VPS, Cloudflare, DNS, Nginx.
- Containerization: Docker, Podman, Kubernetes.
- Databases: PostgreSQL, NoSQL, Vector Databases, Supabase.
- Frameworks: React, Vite, Node.js, Web3, iOS SDK.
- Tools: Git, Github, LLM integration, Websockets, OBS, Unity.

EXPERIENCE & PROJECTS

UniKL MIIT KAiLA Internship (August 2026 - December 2026)

- Accelerated iOS application prototyping and feature delivery within a Swift development environment to support the KAiLA mobile ecosystem.
- Engineered a local AI backend server on Apple Silicon to power the iOS application, deploying and optimizing the Gemma model with an integrated Retrieval-Augmented Generation (RAG) pipeline for low-latency, on-premise inference.
- Automated live production layouts by engineering a voice-controlled OBS Studio ecosystem utilizing Python and Deepgram AI services, streamlining stage operations.

Microsoft Azure Factory Data Simulation Infrastructure

- Engineered a containerized Python data pipeline to process simulated factory telemetry data from Kaggle, routing structured outputs to Azure Cosmos DB for low-latency storage.
- Streamlined deployment workflows by utilizing Linux Podman to build and push images to Azure Container Registry (ACR), successfully orchestrating the workload across a newly provisioned 2-node Azure Kubernetes Service (AKS) cluster.
- Ensured high system reliability by establishing comprehensive observability, integrating Azure Monitor and Log Analytics with Azure Managed Grafana to track node health and ingestion metrics in real-time.

Freelance On-Premise Deployment (JMB Web System)

- Digitized residential financial operations for a client in Sepang by leading the infrastructure architecture, engineering a local PostgreSQL database and automated data migration pipelines to seamlessly support a partner-developed web application.
- Standardized the on-premise deployment environment by containerizing the application stack utilizing Docker and implementing Cloudflare Tunnels to establish encrypted, internet-facing connectivity without exposing local network ports.
- Validated overall system resilience and enforced infrastructure security by executing comprehensive server stress tests and configuring Web Application Firewall (WAF) protections prior to client handover.

EDUCATION & TRAINING

Diploma in Information Technology | Universiti Kuala Lumpur MIIT | July 2024 - December 2026

- Graduate with CGPA 3.5
- Relevant Coursework: Web Application Architecture, Database Systems, Systems Management, Statistical Analytics.

AWS Cloud Foundational | Project Ignite AWS re/Start Cohort 5| Oct 2026 - Feb 2027

- Selected for an intensive 4-month cloud engineering program by Forward College, focusing on core AWS compute, storage, IAM, and networking primitives.
- Executed hands-on labwork utilizing the AWS Management Console and Amazon Linux environments to provision virtual compute workloads and expand multicloud infrastructure capabilities.

Skill Badges

- Microsoft Azure AZ-900: Earned badges covering fundamental cloud infrastructure of Azure Compute, Azure Networking and Azure Governance.
- Microsoft Azure AI-200: Former exam candidate. Earned skill badges in Azure Kubernetes Service, Azure Container Apps, Azure Event Grid, Azure Data Services, Azure Managed Redis and OpenTelemetry.
- Google Cloud: Earned skill badges in Google Kubernetes Engine, GPU Computation and Machine Learning Operations Fundamentals.

ADDITIONAL SKILLS

- Languages: Mandarin, English, Bahasa Melayu.
